EDUCATION

University Of Alberta

Expected Apr. 2027

B.Sc. Computing Science, Software Practice Option, Minor in Economics

SKILLS

Programming/Database Languages: Python, JavaScript, TypeScript, SQL, PHP, Java, C, C++, C#, R, HTML, CSS, LaTeX, MySQL, SQLite, Assembly (RISC-V), MongoDB, XML.

Frameworks & Tools: Git/GitHub, Docker, Power BI, TensorBoard, Powershell, Node.js, Firebase, Excel, Linux (GNU/POSIX), PowerPoint, Word, Splunk, Bash, React, React Native Android, ERP, Arduino, Flask, AWS, Django.

Soft Skills: Problem solving, Agile methodology, Collaborating, Communicating, Self-motivated, Independent work, Team-driven, Curious.

PROJECTS

EDSS Navigator App

Jan. 2026 – Apr. 2026

Python, FastAPI, TypeScript, React Native (Expo), Agile Development, Docker

- Built a full-stack app for EDSS that brings together community resources and organizes them by age group and type of support, making it easier for 1500+ people to find the help they need.
- Worked on both the front end and back end as part of an Agile team, helping design features, built sequence diagrams, write and test code, wrote documentation, and collaborate using Git throughout the development process.

OpBlock (SafeWalk)

Mar. 2026

Flask, Python, JavaScript, RestAPI, SQLite, CSS, Scrum

- Developed a full-stack web application that enables students to request verified volunteer safe walkers in real time, integrating the Google Maps API for location selection and route validation.
- Designed backend logic and admin dashboard features for managing walk requests, assigning volunteers, tracking walk history, and sending automated email notifications.

Career Canvas

Jan. 2026

React, JavaScript, HTML/CSS, SQLite, Docker

- Developed a HTML/CSS full-stack job application organizer to reduce the cognitive load of modern job searching through structured tracking and automation.
- Implemented a React-based front end with a visual application pipeline, enabling users to track applications from wishlist to offer stages with the use of JavaScript.

Neuromotion

Nov. 2025

Machine Learning, Pytorch, Python, JavaScript, HTML, Open BCI

- A winner in the Medtech Division at natHacks 2025, receiving \$2,000 in funding for an AI-driven digital health solution.
- Developed and trained a Linear Discriminant Analysis (LDA) model in PyTorch achieving 73%+ accuracy with sub-500ms latency to detect movement intent using machine learning.

EXPERIENCE

Alberta Bionix - Student Led Engineering Club

Edmonton, AB

Full-stack Developer & Researcher

Sept. 2025 – Present

- Developed safety-critical research software to acquire, process, and visualize biomedical sensor data used in experimental studies.
- Worked directly with engineers and researchers to gather requirements, refine features, and deliver end-to-end solutions in an agile development process.

Help Young Minds Initiative - Student Led Tutoring Club

Edmonton, AB

Executive & Webmaster

Apr. 2025 – Apr. 2026

- Redesigned and maintained the tutoring club's website to improve accessibility, usability, and content clarity, increasing volunteer participation and student/parent engagement.
- Built automated forms and scheduling tools to streamline sign-ups and tutoring sessions, collaborating with the executive team to align digital initiatives with organizational goals.
